- ✓ suitable for trailing chain
- ✓ black PUR cable, halogen- and silicone-free
- ✓ straight or angular cable sockets
- ✓ straight cable connectors
- ✓ IP67 system of protection when screwed down
- ✓ contact-no. / wire color to EURONORM
- ✓ LED-display for signal and operation

ipf-SENSORFLEX®
ready-made connection cables

description

Today, actuator and sensor cables are some of the most important components in the field of connection technology. They are used as connections between sensors/actuators and distribution terminals and/or field bus modules. Extruded onto one side of the **ipf-SENSORFLEX®** lead is a coupling (socket) and on the other side, a connector. Depending on the embodiment, these come with an M8x1 or an M12x1 thread. The extrusion mould offers particularly good protection against the infiltration of moisture and dirt. All leads fulfill system of protection IP67 as a minimum standard. Available are versions with LED-display for “operation” and

“signal”. Please keep in mind that cables with “signal”-LED are not used when connecting sensors with analog outputs. The connection cables can be used in cable drag chains without problems.

The outstanding features of the connection cable are:

- ▶ high mechanical-dynamic resilience
- ▶ halogen-free, silicon-free and PVC-free
- ▶ suitable for trailing chain
- ▶ resistant to coolants and lubricants
- ▶ good impermeability and vibration resistance
